

Combined folding support for counterweight, 200-600 / 1200mm

Article number: 1090300

Stand for counterweight / low pit top

Foldable buffer stand placed below the counterweight in order to get enough rescue space above the lift car.

The fixed part works as a counterweight buffer during normal runtime. Delivered with switch which is connected so that the lift not can run on normal runtime with support stand unfolded.

The hinged support stand is 1200 mm high the fixed part is delivered 600 mm high and can be cut to the correct height on site. (smallest height 200 mm).

Maximum load for buffer stand support with installed buffers

upper buffer stand (Support stand): **Max 6900kg at 1m/s**

Lower buffer stand (fixed part): **Max 10000kg at 1m/s**

Maximum shear force on bottom shaft at maximum load: **5000KN**

Buffer installed are certified for: **400-950kg at 1m/s**

320-3300kg at 0,63m/s
