

SafeLine SL6 voice station, surface mount design in dark matter black with pictogram lenses & button

The thinner and uniformly designed voice station for the SL6 in dark matter black

An updated and even thinner version of the voice station for the lift emergency telephone SafeLine SL6. This sleek design with a dark matter black finish allows for the station to truly blend in with a uniform look. As part of the SLB3 series, this voice station comes with only two address selectors, so you don't have to set the station addresses manually.

Easily mounted with the supplied mounting bracket for a quick and smooth installation.
