

## SafeLine SL6 voice station, flush mounting with emergency LED

---

### The original-sized voice station with up to six assignable addresses

The front plate is mounted using four screws. LED's for external pictograms and an emergency button can easily be connected using the included RJ45 cable.

SLB-Rec-LED can be used as a voice station in the car only or as a part of a fire intercom system. Assign the station an identity by using the address selector on the short side of the unit and configure the main unit SL6 to match your desired setup.
