

SafeLine SL6 voice station, surface mounting with LED pictograms & LED frame

The original voice station for the SL6 with up to six assignable addresses

The original-sized version of the voice station, equipped with LED pictograms and a built-in LED-rail for emergency lighting when activated. Delivered with a front plate for surface mounting with only two screws, enabling a very quick installation and letting you connect external alarm button of choice.

Use either as an ordinary voice station or as part of a fire intercom system. Assign the station an identity by using the address selector and configure the main unit SL6 to match your desired setup.
