

Combined folding support for counterweight, 200-600 / extensible top 1000- 1200mm

Article number: 1090301

Stand for counterweight / low pit top

Foldable buffer stand placed below the counterweight in order to get enough rescue space above the lift car.

The fixed part works as a counterweight buffer during normal runtime. Delivered with switch which is connected so that the lift not can run on normal runtime with support stand unfolded.

The hinged support stand is adjustable top between 1200- 1000mm (adjustment intervals of 40mm). The fixed part is delivered 600 mm high and can be cut to the correct height on site. (smallest height 200 mm).

Maximum shear force on bottom shaft at maximum load: **5000KN**

Buffer installed are certified for:

400-950kg at 1m/s

320-3300kg at 0,63m/s
